

Your trusted
and reliable
partner

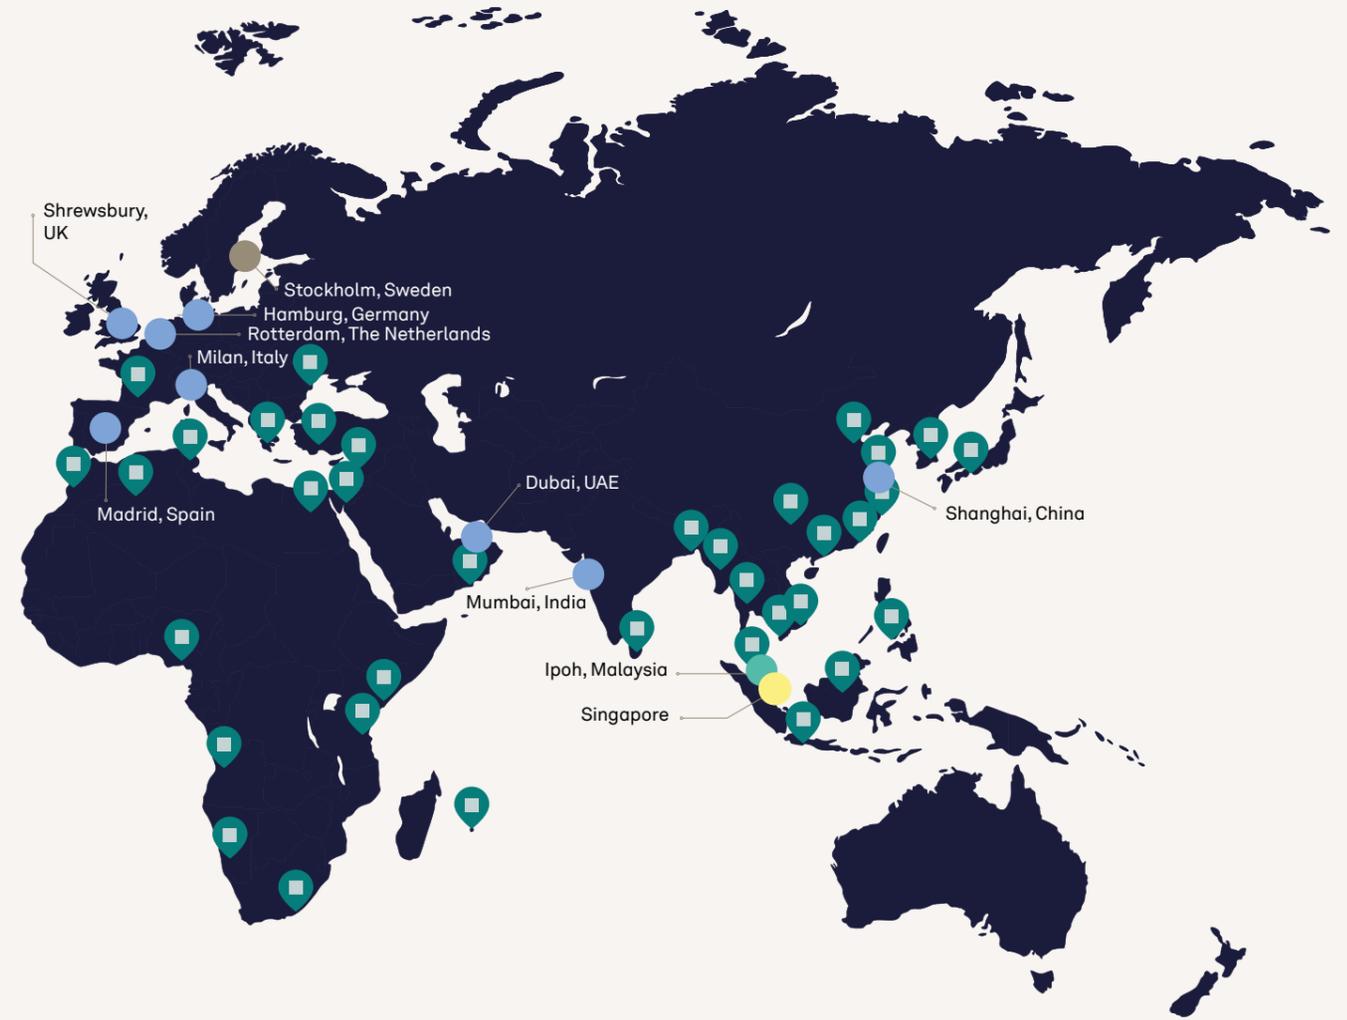

You can rely on us

Since being founded in Sweden over sixty years ago we have helped to keep cargo in motion efficiently and safely through pioneering and innovative solutions that have shaped the global spreader market. A progressive company that people want to work with and for.

As your trusted and reliable partner you know you can rely on us to continue to develop new and more sustainable solutions that will help your operations become more productive, intelligent and eco-efficient. And wherever you are in the world, you can always count on our extensive global network of committed and experienced people who are always willing to go that extra mile.

Now with over 20,000 spreaders in operation around the globe, including 99 of the top 100 ports, you know you can rely on us to be there for you.

Local presence and global reach

Our global sales and service network covers 40 countries on all continents.

- HQ/Regional office
- Production site
- Sales offices
- Regional offices
- Local representatives

Our values

At Bromma we have four key values that guide us in everything we do.

Reliable

We are reliable and trustworthy, just like the spreaders we design and build.

Pioneering

We are constantly moving forward, harnessing the latest cutting edge technology.

Responsible

We are committed to developing more sustainable products and partnerships.

Always there

Our people are always ready to go that extra mile.

Why choose Bromma?

Spreaders

We offer a full range of spreader solutions that are suitable for a variety of applications, no matter what sort of container you need to get moved.

Bromma spreaders are known for their unstoppable performance, high rates of productivity and long-term reliability. With a full range of digital support tools, we can help you keep your spreader operating optimally, maximizing availability rates and lowering your total cost of ownership.

You have a choice of single, twin and tandem spreaders operated hydraulically or electrically made from high

quality light weight, low carbon or fossil free steel, our spreaders will keep on delivering day in and day out. You just need to choose from our extensive range of:

-  STS Spreaders
-  Yard Spreaders
-  Mobile Harbour Crane Spreaders
-  Mobile Equipment Spreaders

Support services

Bromma Services can help maximize the lifetime value of your spreaders. Whether it's through inspections and recommendations, refurbishments or upgrades, we will help your terminal extend the life of your spreader, reduce their environmental impact, and improve your return on investment. Our extensive global network of experts and our range of genuine parts makes sure your spreaders remain safe, reliable, and future-proof.

Digital Solutions
Bromma is utilizing the latest technology so you can get more from your spreader. Each spreader's control unit enables it to be connected to our Spreader Monitoring System or other external systems, while Bromma Hawkeye, our advanced camera based system allows your operators to see more so they can operate their spreader more efficiency and safely.

-  **Training**

Building a low carbon future

Bromma has a long history of pioneering environmentally friendly solutions. We introduced the first all-electric yard crane spreader in 2001, setting a new industry standard. Since then, we have continued to lead the way, developing more sustainable solutions to help our industry achieve its environmental objectives.

Our approach to sustainability is holistic, encompassing Environmental, Social, and Governance (ESG) principles. We ensure our environmental ambitions are built on a foundation of safe, inclusive, transparent, and ethical business practices.

Our climate commitment
Our solutions and actions help build a world where global warming stays below 1.5°C and a circular economy replaces the wasteful linear one. We continually

seek ways to minimise our negative impacts while optimising our positive contributions across our entire value chain, from design and sourcing to product use and end-of-life.

Actions to cut emissions in our own operations:

- **Solar-powered operations:**
Approximately 40–45% of our manufacturing facility's energy comes from on-site solar panels
- **Renewable Energy Certificates (RECs):** The remaining energy is backed by RECs, ensuring a full clean-energy supply

Electric forklift transition: our facility in Ipoh, Malaysia has converted 8 forklifts (2.5-ton) to electric and operates 9 electric units, with ongoing plans to fully electrify the fleet.

A tradition of innovation

At Bromma innovation is what we excel at, with all of our spreaders a reflection of our value driven engineering culture where we focus on delivering solutions that will positively impact your operations. Our goals are a reflection of your needs:

- Improving productivity so you can move more containers per hour
- Greater reliability so you can improve availability levels
- Simple service friendly design making maintenance easier
- Easy to use so you can get more out of your spreader
- Accessible diagnostic tools so you always know the state of your spreader
- To design safer and more sustainable solutions so you can reduce unnecessary incidents and lower emissions
- To harness the power of digital technology and data to create more intelligent solutions that help to enhance your operations.
